

# About companions at dialysis clinics

We do not allow companions inside the clinic.

However, if you are staying in a private room, only family members can accompany you.

We have established rules regarding escorts, so please follow the staff's instructions.

## Infection control rules for entering the room

- ① Those who are unwell (fever, respiratory symptoms) are not allowed to enter the clinic.
- ② Please wear a mask and cooperate with cough etiquette.
- ③ Please disinfect your hands at the entrance, do not touch anything, and strictly refrain from talking privately before entering the hospital room.

## About eating and drinking at the clinic

- ① Please refrain from bringing in food.
- ② Water intake will only be allowed in the lobby.  
However, only containers with lids such as PET bottles may be brought in.

Thank you for your understanding and cooperation.
